Justin Brown

SKILLS

Programming: SQL, Python, C++

Data Visualization: Advanced in Excel, Google Sheets, R. Proficient using Tableau and git.

Server: Amazon Web Server, and Digital Ocean hosting a Linux based, docker installed database. Using PuTTY, and SSH.

CAREER OBJECTIVE

Prospective data analyst who strives to ask and answer business orientated questions with data driven answers. Through development of personal projects, and courses taken through Coursera, I have learned the importance of having an iterative, data focused approach to analysis. I will leverage these skills to bring value to companies looking for data driven decision making.
